PROFILE

Detail-oriented research analyst with a Biotechnology background, focused on supporting evidence-based strategic decisions by aligning research insights with organisational and market objectives.

EDUCATION

CHANDIGARH UNIVERSITY

Mohali, Punjab, India

Bachelor of Engineering in Biotechnology | CGPA – 8.31

2022 – 2026

GYAN NIKETAN

Patna, Bihar, India

10+2, Medical (CBSE) | Percentage – 89%

2021

RPS RESIDENTIAL SCHOOL

Patna, Bihar, India

10th (CBSE) | | Percentage – 92.4%

2019

SKILLS

Technical: Data Analysis, Clinical Dx, Nano-Synthesis, QA/QC, GMP/WHO, Biochem Assays, Research & Reporting

Tools: Power BI, Excel, ELISA & VITEK, BACT/ALERT 3D, DxC 700 AU, General Lab Equipment, Figma, Canva

EXPERIENCE

Khushru Medicare

Solan, India

QA/QC Laboratory Intern

May - Jul 2025

- Led WHO–GMP compliance across pharma batches, ensuring 100% sterility for batch release.
- Executed 40+ sterility assays and packaging checks, cutting contamination risk by 15%.
- Optimised QA documentation and inspection workflows, boosting audit readiness & efficiency.

Tata Main Hospital (TMH)

Jamshedpur, India

Student Intern

May - Jul 2024

- Performed 100+ biochemical assays using DxC 700 AU, improving diagnostic accuracy and result reliability.
- Operated BACT/ALERT 3D & VITEK-2 for 50+ blood cultures, reducing pathogen ID & AST time by 25%.
- Conducted ELISA & rapid tests for 200+ samples, enabling early disease detection.

Academor – Nanotechnology Internship (IIT Bombay Techfest)

India

Student Intern

Jul - Sep 2023

- Green-synthesised Ag & ZnO nanoparticles with +18% yield and +30% antimicrobial efficiency.
- Developed reproducible experimental workflows with statistical validation and structured reporting.
- Proposed industrial biomed-coating application and received positive feedback from IIT Bombay mentors.

PROJECTS

Microbial Fuel Cell (MFC) - Bioelectricity from Organic Waste

Aug - Dec 2025

- Generated 2.38 V stable output for 22 days using mixed organic waste.
- Built all components from waste materials, ensuring a sustainable approach.
- Demonstrated low-cost, community-scale waste-to-energy solution (SDG 7, 11, 12, 13).

Eco-Friendly Biodegradable Gloves

Jan - Jun 2025

- Developed biodegradable gloves with antimicrobial nanocoating, increasing lifespan by 15%.
- Tested tensile strength on 10+ samples, matching the durability of nitrile gloves.
- Secured 2nd place in departmental pitch; prepared patent feasibility for scalable lab use.

ACHIEVEMENTS

- Best Thesis Paper Presentation Award – ICNMGT-2024
- 2nd Place – Oral Abstract Presentation at ICCMAS-2024
- 2nd Place – Start-Up Pitch Competition (Biodegradable Gloves)
- 2nd Prize – District Poetry Contest

CERTIFICATIONS

- National Intellectual Property (IP) Awareness
- Industrial Biotechnology
- Foundations of Project Management
- Introduction to Artificial Intelligence (AI)
- Medical Technology and Evaluation
- Genes and the Human Condition
